

To whom it may concern:

I am writing this letter of recommendation for Chris Tucker and his team at AMI Inc., who I have had the pleasure of working with for the approximately 20 years in my tenure at AAR Miami. The AMI team has been involved in multiple projects with me and has provided complete support in planning maintenance activities which include removal/ cleaning / inspection /repair /overhaul /installation, and overall technical expertise in all areas of aircraft interior maintenance and engineering.

The AMI team is a detailed group of experienced technicians with a management support team that understands all aspects of aircraft interior maintenance.

I can speak of many instances of where the AMI Team has assisted us and has brought a level of comfort to our clients who know when AMI is involved they will get a top of the line product which reflects the quality, workmanship, customer service and reasonable pricing that AMI is known to offer.

One instance of prominence I can recall is with a customer with a special requirement. The customer was doing a new interior modification to their aircraft which required FAA inspection and approval in every aspect from engineering to parts procurement to final installation. The interior parts for this project had to be handled per FAA regulations and with spot FAA Inspections and oversight.

The AMI Team in coordination with the AAR Quality Management, Customer Quality Management and within FAA regulations and guidelines; inspected, inventoried, segregated and quarantined material shipments at their facility from both domestic and international vendors to meet FAA and customer requirements.

AMI worked with AAR Miami to modify and install the new interior for our customer and assisted with getting FAA approval for work performed. The AMI team was a main factor in making the project a success; they were always available with a solution when difficulties arose which they do from time to time, and this is why I believe their customer service and expertise is second to none.

From a personal standpoint I always look for a team with certain qualities to work with.

The projects, jobs and challenges will always change, but having a team with the commitment, integrity and expertise to work with, for me makes the difference, and AMI is that team.

I can be reached via the contact information below to discuss further if necessary.
